Retail	\$11.00	\$1.00			

GOAL  9 billion tonnes of carbon = 135 billion trees

Current as at April 2022

DISCLAIMER: The above figures reflect what an Advocate can receive from tree sale activity within a qualifying month from the levels within their organisation as per the Advocate Rewards Program. The income an Advocate can create is unlimited and is paid monthly. Figures supplied are a guide only reflective of potential income possible from everyone duplicating the same tree club and team structure within an Advocate's organisation. This reflects the number of trees purchased from Customers and Advocates within their organisation to restore balance to the planet. Financial Rewards may differ in different countries; however, the percentages remains the same. The above figures have been rounded up to the nearest full dollar value*.

To qualify for the Advocate Rewards, an Advocate MUST achieve 30 Personal Volume (PV) Points in ECP sales from Customer sales and/or personal tree purchases each qualifying month. Activity from Advocates and Customers within an Advocate's organisation do not contribute to the 30 PV Points for the Advocate. *Rewards are paid monthly in AUD. Advocates are responsible to keep their account details current for payments to be made via the Advocate Portal.

** ECP Definition – Environmental Care Package. Each tree purchase includes sourcing, planting and support, to ensure the longevity and health of every tree to reach maturity. This also includes education for the participating Farmer in Regenerative Agriculture methods.
